### 5. Suggestions for improvement

- Conduct more industry relevant sessions. So that students will connect the syllabus with practical implementation.
- Practical knowledge should be involved

- Please try to include some analytical software training, like SPSS
- There can be fewer subjects which can further studied in depth I feel. There should not be activities but placement meetings on Saturdays so students can start finalizing their final placements. Also there should be less emphasis on assignments and we should be given more material to study with proper books and authors.
- Should have guest lectures who are working in industries and can share and guide the students in grasping the relevant subject.
- Keep it more relative to the industry scenarios. what studied should be more in depth with the corporate world.
- there should be more practical oriented lectures .
- Worst clg
- All good
- More of practical experience in college is required the most  
Eg: discussion with industrial experts, workshops on current trends, and mock interviews
- We should add some more interesting and future oriented syllabus like in finance purely add whole book on Equity and Debt Market.
  - Can emphasis syllabus more on practically
