International Women's Day Celebration

International Women's Day is a global day celebrating the social, economic, cultural, and political achievements of women. The day also marks a call to action for accelerating gender parity. Significant activity is witnessed worldwide as groups come together to celebrate women's achievements and women's equality.

Sheila Raheja School of Business Management and Research celebrated International Women's Day on March 6, 2023.

The programme was organised under the guidance of Dr. H.J. Bhasin, Director, SRBS. The coordination was done by Prof. Sonali Shiralkar, Prof. Darshana Murkibhavi, and Prof. Deepa Manoj, along with our SRBS students, Mr. Yash Mistry, Ms. Louan Rodrigues, and many others in coordination with WDC and IIC. Some students had made wonderful Rangolis on the esteemed theme of Women's Day. Session started with lamp lightening ceremony. Felicitation of guests was done by Director Dr. H.J. Bhasin. Wonderful Audio Visual (AV) were presented by students to introduce and highlight journey of our guest speakers.

IPS Tejaswi Satpute and Sangeeta Puneekar, co-founder of the Advait Foundation and a social worker, were the guests for the event. Tejaswi madam put light on equality and the ability to perform duties with strength; self-assurance, decision-making skills, and knowledge were admirable. She put light on the Tri Sutri of willingness, efforts, and consistency and believes that "Don't Keep Anything For Options...!" Her work in "Operation Parivartan" speaks a lot about the title conferred on her "Lady Singham of Solapur".

Sangeeta Puneekar madam enriched the gathering with her knowledge on laws and rights for women in India. She created awareness among the students regarding the same. Her enriching words made the audience reflect on their lives. It was indeed a noble event organized by the Institute, which served the aim of empowering women and making them feel appreciated and valued. SRBS Students entertained the gathering with their singing and dancing skills.

The programme was well appreciated by all the students and members of the audience.

The Institution Innovation Council and Entrepreneurship Development Cell of Sheila Raheja School of Business Management and Research organized an online session to acquaint the students of MMS with knowledge of the "Out of the box thinking for problem-solving" on 28th June 2022.

The speaker of the session was Prof. Veezhinathan Kamakoti, Director, IIT Madras whose area of expertise is computer science and software engineering and also holds a Ph.D.

Out of the box thinking is a metaphor that means to think differently, unconventionally, or from a new perspective. This phrase often refers to novel or creative thinking. To think outside the box is to look further and to try not thinking of the obvious things, but to try thinking of the things beyond them or even other than them. This was explained by Prof V Kamakoti in depth with the help of real life examples which enabled students to understand why out of the box thinking is important in today's competitive world and how it gives you an edge when dealing with real life scenarios.

Prof Kamakoti further introduced a course on Out of the box thinking which IIT Madras is launching where candidates will be taught to find solutions to problems by using reasoning that is not immediately obvious and involving ideas that may not be obtainable by using only traditional step-by-step logic. In this unique course, such thinking is emphasized through rediscovering the known and unknown facts of mathematics logically with an interesting broader perception and the manner of doing it.

GUEST LECTURE ON RETAIL MARKETING

Guest lecture on "Retail Marketing" was organized on 18th October 2019. Mr. Mukesh Kumar, CEO of K. Raheja owner of Infinity Mall was invited as speaker to deliver his views on the subject matter which is relevant and important from the career point of view of marketing students.

Due to the rich experience of guest speaker, he could effectively explain the issues entailed in the retail marketing such as:

1. The customer is the most important person in your business

The main retail principle to master is: the customer is king. They should be the centre of your business, and everything you do must revolve around customer needs. Knowing them and focusing on them in everything you do, will help you grow your business and your team.

2. Retail is detail

So, you need to address and improve your understanding of your customer. To do this, every retailer must focus on the detail, and get things right the majority of the time. Mistakes are OK, but you must learn from them and don't repeat sloppy errors. Customers will allow you some mistakes, but too many will turn them away.

3. Understand the four Ps

This is a very old principle but still has validity. The four Ps - Product, Price, Place, Promotion - are the basic foundations of a successful retail business.

Product

You need products that your customers want to buy, and a product range that will satisfy your customers' needs and desires. The products must also deliver a profit for you to have a successful business.

Price

Price must be consistent across your range and meet all requirements for your business. You need to price your product range at the correct level for the customers to be able to buy your products, and for them to gain value from them. This could mean pricing high or low - this very much depends upon your customer offering.

Place

You need to provide the right place for your customers to purchase your product, be that a physical store, a catalogue or an ecommerce website - or a combination.

Promotion

Once you have a product - at the right price, in a place where the customer can access it - you need to tell them about this and promote your business and your products.

4. Go the extra mile for your customer

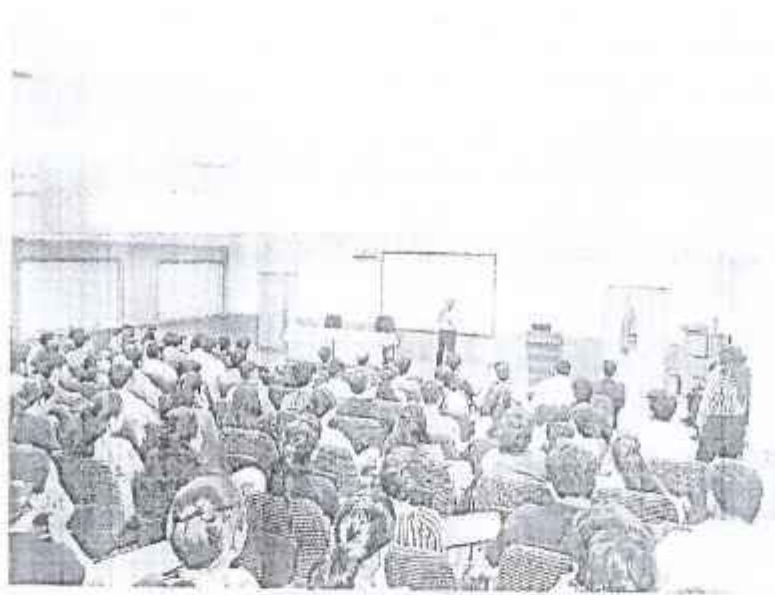

Providing great customer service starts with understanding and knowing your customer; however, knowing them is just the start of the journey. To be successful you must deliver world-class customer service - continually going the extra mile, each time delivering just a little more than the customer expects.

Doing this each time you and your team interact with your customers will win them over and make them loyal over a long period of time.

5. Location, location, location

Historically, location has been one of the most important factors in retail success, and still to this day it will have a major impact on the performance of a physical store

It was indeed a knowledge sharing experience to the students of Marketing.
